K-8: Reflecting for the year-ahead

Click [here](#) to login and access the Amplify Science PD Library 'Microlearning courses' to get started!

Available January 15, 2025 - March 15, 2025

K–5: Connecting to prior knowledge

- This K–5 microlearning resource builds your understanding of the Our Experiences and What We Think We Know Chart routine which is used to support students in making connections to prior knowledge. Examples of using the Chart routine and planning for using the Chart routine are provided.

6–8: Making connections to prior knowledge

- This 6–8 microlearning resource is designed to build your understanding of using the Personal Connections Concept Map with students. Examples of Personal Connections Concept Maps and recommendations for planning are provided.

K–8: Enhancing understanding with Unit Extensions

- This microlearning module dives into the Unit Extensions, which are provided for every Amplify Science unit. You will learn how to access the Unit Extensions, get ideas from other teachers for using them, and start planning for unit extension opportunities.

Available April 15, 2025 - June 15, 2025

6–8: Support with Active Reading

- This 6–8 microlearning module will deepen your understanding of the Active Reading routine while also providing you with recommendations to support your implementation of the routine

K–8: Making connections to literacy through discourse

- This microlearning module provides support for connecting literacy to Amplify Science through the use of the discourse routines. Examples of discourse routines, ideas for using them in the classroom, and slide templates for customization are provided.

Available July 15, 2025 - September 15, 2025

K–8: Reflecting for the year-ahead

- This microlearning resource guides educators through a reflection and vision setting protocol focusing on three major components of implementation. A template and guiding questions are provided to organize educators' reflections and goals for the year.
