

Annotation Tracker: Summary Sheet

Use the Annotation Tracker: Summary Sheet to identify trends in students' thinking. This sheet can be used after class if you have time to go over students' annotation work. Use the Tally column to record how many students in each class had a particular question or alternate conception, identified a certain word or phrase, focused on an interesting idea, or used a specific annotation style.

Class/Period _____

Students' alternate conceptions	Tally
Recurring questions	
Difficult words and phrases (list)	
Hotspots in the text (e.g., diagrams, sentences, or whole paragraphs that many students annotated)	
Inventory of strategies for annotating the text (e.g., coding, highlighting, drawing arrows)
