

TEKS: (S) = Supporting standard (R) = Readiness standard (NT) = Not tested

TEKS	5.1.A	5.1.D	5.1.G	5.4.A (S)	5.4.E (S)	5.4.F (R)	5.4.G (NT)	5.4.H (R)	5.6.A (S)	5.6.B (S)
Problem(s)	3	4	9, 10	8	10	7, 9	2, 4	2–6	1	1, 3

Problem 1				 TEKS: 5.6.A, 5.6.B
4 Meeting	3 Approaching	2 Developing	1 Beginning	
<b>Correct response:</b>  18	Some responses may show more understanding than others. Consider assigning Approaching or Developing based on what can be determined about the student's understanding when applicable		Response shows <b>limited understanding</b> .	
	Students who select . . . <ul style="list-style-type: none"><li>• 12 may have thought the prism was only 2 layers.</li></ul>			

Problem 2		 TEKS: 5.4.G, 5.4.H, 5.1.D	
4 Meeting	3 Approaching	2 Developing	1 Beginning
<p><b>Both correct</b> choices and <b>no incorrect</b> choices.</p> <p><b>3 × 4 × 5</b> <b>5 × 12</b></p>	<p><b>One correct</b> choice and <b>no incorrect</b> choices.</p> <p><b>Both correct</b> choices and <b>one incorrect</b> choice.</p>	<p><b>One correct</b> choice and <b>one incorrect</b> choice.</p>	<p><b>Only incorrect</b> choices.</p> <p><b>Two or more incorrect</b> choices with some correct choices.</p>
		<p>Students who select . . .</p> <ul style="list-style-type: none"><li>• (3 + 4) × 5 or 3 × 4 + 5 correctly determined the prism’s dimensions and may need more support understanding the operations needed to determine the volume.</li><li>• 15 × 15 × 15 × 15 correctly determined there are 15 unit cubes in each of the 4 layers and may need more support understanding the operation needed to find the total.</li></ul>	
<p><b>Math Process Standards:</b> Response demonstrates an understanding of multiple representations (numeric expressions) for the volume of rectangular prisms. <b>(5.1.D)</b></p>			

Problem 3				TEKS: 5.4.H, 5.6.B, 5.1.A
4 Meeting	3 Approaching	2 Developing	1 Beginning	
<p><b>Correct response:</b></p> <p><b>384 boxes of paper clips</b></p> <p><b>Sample work shown.</b></p> 	<p>Response shows <b>conceptual understanding</b> with minor errors, omissions, and/or incomplete reasoning.</p> <p>E.g., Students who write an incorrect answer — but whose work or explanation shows evidence of understanding that the volume is the product of 48 and 8 — may have made an error in calculation.</p>	<p>Response shows <b>incomplete understanding</b> with significant errors.</p> <p>E.g., Students who write <i>56 boxes of paper clips</i> may have added 48 and 8 and may need support understanding the layered structure of rectangular prisms.</p>	<p>Response shows <b>limited understanding</b>.</p>	
<p><b>Math Process Standards:</b> Students apply the concept of volume to problems arising in everyday life. <b>(5.1.A)</b></p>				

Problem 4			TEKS: 5.4.G, 5.4.H, 5.1.D
4 Meeting	3 Approaching	2 Developing	1 Beginning
<p><b>Both correct</b> choices and <b>no incorrect</b> choices.</p> <p>6 × 20</p> <p>4 × (5 × 6)</p>	<p><b>One correct</b> choice and <b>no incorrect</b> choices.</p>	<p><b>One correct</b> choice and <b>one incorrect</b> choice.</p>	<p><b>Only incorrect</b> choices.</p>
	<p>Students who select . . .</p> <ul style="list-style-type: none"><li>• 5 × 4 + 6 correctly determined the expression to represent the area of the base and may need more support understanding the operation needed to determine the volume.</li></ul>		
<p><b>Math Process Standards:</b> Response demonstrates an understanding of multiple representations (numeric expressions) for the volume of rectangular prisms. <b>(5.1.D)</b></p>			

Problem 5			 TEKS: 5.4.H
4 Meeting	3 Approaching	2 Developing	1 Beginning
<b>Correct response:</b> <b>10</b>	Some responses may show more understanding than others. Consider assigning Approaching or Developing based on what can be determined about the student's understanding when applicable.	Response shows <b>limited understanding</b> .	
	Students who select . . . <ul style="list-style-type: none"><li>• 7 may have added the length and width.</li></ul>		

Problem 6				 TEKS: 5.4.H
4 Meeting	3 Approaching	2 Developing	1 Beginning	
<b>Correct response:</b> <b>1,200 cubic inches</b>	Response shows <b>conceptual understanding</b> with minor errors, omissions, and/or incomplete reasoning.  E.g., Students who write <i>1,200 square inches</i> determined the correct numeric value and may need support with appropriate units of measure for area and volume.	Response shows <b>incomplete understanding</b> with significant errors.  E.g., Students who write <i>300 inches</i> may have thought they were finding the length of a rectangle whose area is 200 square inches and whose height is 6 inches.	Response shows <b>limited understanding</b> .	

Problem 7				TEKS: 5.4.F
4 Meeting	3 Approaching	2 Developing	1 Beginning	
<b>Correct response:</b> <b>141</b>	Some responses may show more understanding than others. Consider assigning Approaching or Developing based on what you can determine about the student's understanding, when applicable.		Response shows <b>limited understanding</b> .	
	Students who select . . . <ul style="list-style-type: none"> <li>• 138 correctly added 5 and 19 first and may need more support understanding the order of operations to multiply by 2 before subtracting 1.</li> <li>• 84 may have multiplied 2 by 5 first and then added 19 and may need more support understanding the order of operations.</li> <li>• 48 may have multiplied 3 by 2 first and may need more support understanding the order of operations.</li> </ul>			

Problem 8

TEKS: 5.4.A

4 Meeting	3 Approaching	2 Developing	1 Beginning												
<p><b>All correct</b> choices and <b>no incorrect</b> choices.</p> <table> <tr> <th></th> <th>Prime</th> <th>Composite</th> </tr> <tr> <td>33</td> <td></td> <td>✓</td> </tr> <tr> <td>47</td> <td>✓</td> <td></td> </tr> <tr> <td>51</td> <td></td> <td>✓</td> </tr> </table>		Prime	Composite	33		✓	47	✓		51		✓	<p><b>Two correct</b> choices and <b>one incorrect</b> choice.</p>	<p><b>One correct</b> choice and <b>two incorrect</b> choices.</p>	<p><b>Only incorrect</b> choices.</p>
	Prime	Composite													
33		✓													
47	✓														
51		✓													
<p>Students who select . . .</p> <ul style="list-style-type: none"> <li>• 33 and 47 as prime may have thought that all odd numbers are prime and may need more support understanding the difference between prime and composite numbers.</li> <li>• 51 as prime may have thought that 51 only had 1 pair of factors and may need more support determining pairs of factors.</li> </ul>															

Problem 9				TEKS: 5.4.F, 5.1.G
4 Meeting	3 Approaching	2 Developing	1 Beginning	
<p><b>Correct response:</b>  <b>Sample explanation shown.</b>  <b>Han added 20 and 12 on Line 2, but he should have added <math>3 + 7</math> first and then multiplied by 12 before adding 20. The parentheses tell us to do those operations first. The answer is 67 stickers.</b></p>	<p>Response shows <b>conceptual understanding</b> with minor errors, omissions, and/or incomplete reasoning.</p> <p>E.g., Students describe the error correctly but may need support with using the mathematical language of the unit, e.g., order of operations or parentheses.</p>	<p>Response shows <b>incomplete understanding</b> with significant errors.</p> <p>E.g., Students who may arrive at the correct number of stickers, 67, but may need more support understanding the expression representation and where Han made an error in finding its value.</p>	<p>Response shows <b>limited understanding</b>.</p>	
<p><b>Math Process Standards:</b> Response includes a clear explanation of Han's error and how he could correct his error using mathematical language, e.g., parentheses or order of operations. <b>(5.1.G)</b></p>				

Problem 10				TEKS: 5.4.E, 5.1.D, 5.1.G
4 Meeting	3 Approaching	2 Developing	1 Beginning	
<p><b>Correct response:</b>  <b>Sample explanation shown.</b>  <b>No, Han is incorrect. The order of operations is different in each expression. The parentheses in <math>12(3 + 7)</math> tell us to add first. <math>12(10) = 120</math>. In <math>12 \times 3 + 7</math>, I multiply first. <math>36 + 7 = 43</math>.</b></p>	<p>Response shows <b>conceptual understanding</b> with minor errors, omissions, and/or incomplete reasoning.</p> <p>E.g., Students describe how the parentheses in the expression <math>12(3 + 7)</math> indicate addition before multiplication but may need support with using the mathematical language of the unit, e.g., order of operations.</p>	<p>Response shows <b>incomplete understanding</b> with significant errors.</p> <p>E.g., Students write that Han is correct and describe how the expressions have the same numbers and operations but may need support understanding how the expressions show a different order of operations.</p>	<p>Response shows <b>limited understanding</b>.</p>	
<p><b>Math Process Standards:</b>            Response demonstrates an understanding of how the 2 representations (numeric expressions) communicate different mathematical ideas. <b>(5.1.D)</b>            Response includes a clear explanation of the meaning of the parentheses using mathematical language, e.g., order of operations or multiplication. <b>(5.1.G)</b></p>
